

Key Features

Enhanced usability for Boards and users

The straight forward, simple display and functionalities allow both Board administrators and system users to navigate the site with ease. The transition from your website to the booking site is made even more effortless by the ability to personalise the system to fit each Board's branding, from colour schemes to website addresses (for example: audits.lscb.org.uk).

Stop and save functionality

All organisations completing an audit will have the option to save their progress then return to and update it at any time until submission.

Question flexibility

We offer multiple question formats and the option to group questions per section if required. You can use any combination of the following questions parts:

- Title
- Summary/Rationale
- Description
- Evidence (option to upload documents – of restricted size) (optional)
- Actions required (multiple entries; title; target date) (optional)
- Self-assessment rating
- Board assessment rating
- Free-form answer (optional)

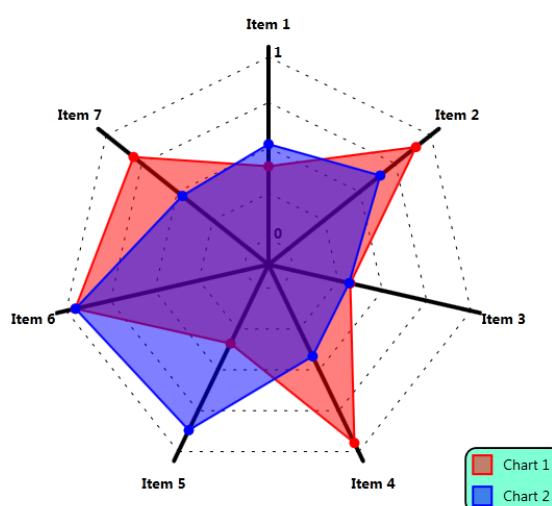

“ Phew's services have been well received by members of Milton Keynes Safeguarding Children Board. They have guided and supported the MKSCB Business Office and worked well with all members of the team. They are knowledgeable and are happy to go the extra mile to ensure that we receive an excellent service. We hope to continue our positive relationship with them in developing an interactive process to help us quality-assure multi-agency practice and outcomes for Children and Young People in Milton Keynes. ”

Jane Held, MKSCB Independent Chair

Reporting

The system will automatically produce the following reports...

- Per organisation (visible to both the Board administrators and the organisation completing it)
 - Action report
 - Spider gram of progress
- Per audit (visible to the Board administrators only)
 - Total not started
 - Total started
 - Total completed
- Per completed audit
 - Graphical report
 - Contact report
